

Tylö steamshower tx202/w.

Flexible, standalone steam column.

The new tx202/w is a standalone steam column with both steam and shower options. Complete with glazed sections, a steam door and a plastic dome, our steam column makes it possible to transform any niche into a fully-functional steam room.

The column comes with a hand shower, a shower head, and a steam nozzle. The shower head can be fixed at a height of between 2180 mm and 1960 mm, and adjusted sideways. Minimum installation size is 2140 mm. The column has shelves for your necessities and Tylö's new h1 control panel with touch control, making it easy for you to control the steam column. The integral steam generator in our steam column tx202/w can be used for rooms of up to 5.5 m³ depending on wall and floor materials.
